

# Earth Day 2010

Help us celebrate our earth and all it provides us. Kids of all ages can have fun learning to identify trees and animals, hike through the forest for a look at how Mother Nature recycles, and learn about some of our native plants and wildlife, including reptiles and amphibians. Help do your part to eradicate some of the invasive plants that are found at Fenner and find out what your carbon footprint looks like.

Sunday, April 18<sup>th</sup> 12:00 to 4:00pm  
Event is free with no need to register.

**Fenner Nature Center**
